Supreme Coding

MONTHLY PLANS FOR SMALL BUSINESS

Dev On Demand

We offer fractional development and AI services.

Like having an in-house developer, without the full-time hire. Call or text us when you need something built, fixed or set up; our team builds it, runs it and supports it.

Reach us Mon–Fri, 9–5 ET
by phone, text or email

Set reply times
same business day, or within 2 business hours on Premium

Rapid emergency response
included on business days, before 4 PM ET

Starting at $995/mo
your price is set after a free consult

REAL EXAMPLES

Here's Exactly What That Looks Like

YOU	WE
Your store's checkout breaks.	**Our team finds the problem and fixes it.**
You want AI answering customer questions.	**We build it, set it up and keep it running.**
You have an idea but aren't sure how to build it.	**We find the best way, then build it.**
Your systems don't talk to each other.	**We connect them so data flows on its own.**
You need a quick feature or a report.	**It just gets done as part of your plan.**
Your staff re-types the same data daily.	**We automate it, with AI or plain code.**

REAL WORK

What Our Team Builds And Supports

Custom software & web apps
Portals, dashboards and internal tools.

AI assistants
Chatbots that answer customers and sort requests.

Business automation
Code that handles repetitive work.

Connecting your systems
CRM, accounting, eCommerce and email.

eCommerce add-ons
Shopify, BigCommerce, WooCommerce, Yahoo/Turbify.

Mobile apps
iPhone and Android apps.

Support & maintenance
Free for the apps our team builds.

Fixes & updates
Bugs fixed and features updated, fast.

Smaller projects, fixes, updates and improvements **are included in your plan** with no separate quote. Big projects, like a whole system built from scratch, are quoted up front with a plan-client discount.

Hi, I'm George Chityat. I look at technology the way an owner does.

I've spent 20+ years owning and running businesses, including a FedEx Ground contracting business. I built and sold my previous software development firm in 2019 and founded Supreme Coding in 2020 in Boynton Beach, FL. We also build and run our own products: Supreme Docs, eShipRate and MyTruckMate.

I'm your first call, and I stay involved. Behind every plan is our team of developers, and the people who build your work are the ones who support it.

HOW YOUR PLAN WORKS

Real Work Every Month: Built, Fixed, Shipped

Smaller projects, fixes and updates are included

Call or text us when you need something. **Our team of developers does the coding, AI and integration work as part of your plan**, with no separate quote and no extra contract.

Coding | AI | Integrations | eCommerce | Fixes

WHAT "INCLUDED" MEANS

Real hands-on work from our team.

Custom software, AI, integrations, eCommerce work, fixes, updates and improvements. **No separate quote, no extra contract.** It all shows up on your monthly work summary.

Big projects, quoted separately
A whole system built from scratch or a major rebuild is its own project. We quote it up front, with a discount for plan clients.

Nothing billed without approval
Project work only starts with your OK by email or text. Your monthly price doesn't change in between, and there's no surprise bill.

A monthly work summary
Every month you get a plain-English summary of what we built, fixed and updated, so you can see exactly what your plan delivered.

AI, DONE HONESTLY

Put AI To Work In Your Business

Customer service assistants
AI that answers common questions on your site, by chat or email.

Client intake
Collect, check and organize information from clients automatically.

Quoting
Faster, consistent quotes built from your own rules and pricing.

Document processing
Read, sort and pull data from forms, PDFs and paperwork.

Email & lead follow-up
Draft replies and follow up with leads so nothing slips through.

Data entry, done for you
Pull details from emails and forms straight into your systems.

Scheduling & reminders
Bookings, reminders and follow-ups that run on their own.

Staff AI training
Hands-on training so your team uses the AI tools we set up.

> **My honest take:** AI is powerful, but it isn't always the answer. Sometimes well-designed automation code does the job better, cheaper and more reliably. Because our team builds both, you get whichever one actually fits.

GETTING STARTED

How It Works

1 Free Consult
Free
By phone, video or in person. Tell me what's slowing your business down and what you want built or fixed.

2 Your Price, In Writing
A short written agreement
We agree on what you need, Standard or Premium, and your flat monthly price. Clear and simple, with no fine print hiding anything.

3 We Get To Work
Starting at $995/mo
Our team starts on your list right away. 3-month minimum, then month-to-month with 30 days' notice. We revisit your price together at renewal.

PROOF IT WORKS

Several days down to a few minutes

We built an insurance quoting system that turned tasks taking several days into a few minutes, using well-designed automation code, with no AI involved.

The work of two full-time positions

A system built by my previous firm took over the work of two full-time positions.

THE MONTHLY PLANS

Pick The Level Of Help You Need

Standard

Coding, AI, integration and eCommerce work for your business. Smaller projects, fixes and updates are included.

Starting at

$995/month

Replies	**Same business day**
Your requests	**Worked in order**
Emergencies	**Rapid response included**
Big projects	**Quoted, plan-client discount**

INCLUDED: SMALLER PROJECTS & FIXES

- **Custom software & apps:** web apps, mobile-friendly apps, custom systems
- **AI services:** AI implementations, assistants, automations
- **Integrations:** connecting your software, platforms and data
- **eCommerce work:** Shopify, BigCommerce, WooCommerce, Yahoo/Turbify
- **Fixes, updates and improvements** to anything we built

FOR THE APPS WE BUILD

- Hosting, email and texts included
- Free support: fixes, security updates, backups

PRIORITY SERVICE

Premium

The same work, done faster: priority on every request and more room for larger requests.

Starting at

$1,950/month

Replies	**Within 2 business hours**
Your requests	**Priority queue**
Emergencies	**Rapid response included**
Larger requests	**More room each month**

Everything in Standard, plus:

FASTER, WITH MORE ROOM

- Replies within 2 business hours
- Your requests go to the front of the queue
- More room each month for larger requests
- Faster turnaround on fixes, updates and improvements

SAME ON BOTH PLANS

- Rapid emergency response, reported on business days before 4 PM ET
- Hosting, email, texts and free support for apps we build

HOW YOUR PRICE IS SET

Your Price, Set For Your Business.

Every business is different, so every client gets their own price. We start with a free consult and talk through your business and what you need built, fixed or set up. Then we send you a flat monthly price in a short written agreement.

3-month minimum, then month-to-month with 30 days' notice. Price revisited at renewal.

Let's talk

SAME ON EVERY PLAN

Included With Every Plan

For the apps and software our team builds for you, these come standard on Standard and Premium alike.

Hosting on AWS

Hosting for the apps we build you, on quality AWS servers. If an app is unusually large (very high traffic or heavy storage), we'll talk it through up front.

Email sending

Up to 10,000 emails a month sent from the apps we build, through our email service.

Text messaging

Up to 500 texts a month to US numbers, sent from our shared business number. Each text counts as 1 part (about 160 characters), so longer messages count as more than one. Need more texts, or your own number? Available for an added fee.

Free support for apps we build

Included, never added to your bill, and handled by the people who built it: bug fixes, security updates, backups and keeping it running. Smaller changes are included; big projects are quoted separately.

WHY A MONTHLY PLAN

Plan vs. As Needed

	Monthly Plan	As Needed
Response times	✓ Same business day, or within 2 business hours on Premium	Scheduled when our team is available
Smaller projects & fixes	✓ Included, no quotes	A quote for each job
Big projects	✓ Quoted with a plan-client discount	Quoted at regular pricing
Emergencies	✓ Rapid response on business days before 4 PM ET	No emergency guarantee
Getting things done	✓ Work keeps moving every month	You only call when something breaks
Hosting, email, SMS, support	✓ Included	Billed separately
Billing	✓ One predictable monthly bill	Billed job by job
Your business	✓ We already know it	We get up to speed each time

THE FINE PRINT, IN PLAIN ENGLISH

Clear Rules, No Surprises

Business hours
Monday to Friday, 9 AM to 5 PM Eastern, excluding major US holidays. Reply times count business hours. Messages sent after hours get a reply the next business day.

What counts as an emergency
Your store can't take orders or payments, a system our team built and supports is down, or a security incident such as a suspected breach. Call or text 561-325-8939; plan clients can text it any day.

Emergency coverage
Rapid response is included on both plans when you report it on a business day before 4 PM ET. Reported later, or outside business hours? We pick it up first thing the next business day.

Term: 3 months, then month-to-month
3-month minimum, then month-to-month. Cancel with 30 days' written notice. We revisit your price together at renewal. Billed monthly in advance.

We're not an IT help desk
Email, Wi-Fi, computers, printers and phones stay with your IT provider. We're happy to work alongside them.

My honest-advice promise
When an off-the-shelf tool fits your business better than custom code, I'll say so, and our team will help you set it up.

Included in your plan

- Smaller projects: coding, AI, integrations, eCommerce
- Fixes, updates and improvements to anything we built
- Hosting, email, SMS and free support for apps we build
- Rapid emergency response, business days before 4 PM ET

Not included

- IT help desk: email, Wi-Fi, computers, phones
- Big projects: quoted separately, with a plan-client discount
- Third-party software, hardware and fees
- Legal or compliance work

What if an emergency happens after 4 PM?
Text the emergency line, 561-325-8939, so it's waiting for us. We pick it up first thing the next business day. It's not a round-the-clock service, and we'll always be upfront about that.

What's included, and what's quoted separately?
Smaller projects, fixes, updates and improvements are included: real coding, AI, integration and eCommerce work. A whole system built from scratch or a major rebuild is quoted up front with a plan-client discount.

How is my price set?
After a free consult, based on your business and the work you need done. You get a flat monthly price in writing, starting at $995/mo (Standard) or $1,950/mo (Premium).

What if my needs grow?
We talk about it openly. You can move to Premium, or we adjust your price at renewal. You'll never get a surprise bill.

What happens to my apps if I leave?
They keep running. Hosting can continue at a regular monthly rate, or our team will happily help you move it wherever you like.

Can I change or cancel my plan?
Move up to Premium at the start of any month. After 3 months, switch plans or cancel with 30 days' notice.

WHO IT'S FOR

Small businesses of every kind, roughly 2 to 50 people, without a tech lead on staff. That includes law firms, mortgage brokers, insurance agencies, medical offices, eCommerce stores, contractors, service companies and plenty of others.

Let's Get It Built, Owner To Owner.

Start with a free consult with me. Tell me what you need built or fixed, and I'll tell you honestly whether a plan makes sense.
